

Macroeconomic Mechanisms in Community Network Clouds

Amin Khan, Felix Freitag

Universitat Politècnica de Catalunya, BarcelonaTech

11th International Symposium on Distributed Computing and Artificial
Intelligence (DCAI '14)

Salamanca, Spain, 4-6 June 2014

Presenter:

Amin Khan

**An idea is like a virus, resilient, highly contagious.
The smallest seed of an idea can grow.
It can grow to define or destroy you.**

Community

Brings Together

Cloud

Community Networks

What's this? A cooperative development of a network

Where: Local, community (city, region, area)

Who: You, and your neighbors, ...

“Don't buy the network, be the network!”

Scalable, self-organized and decentralized IP networks and services built and operated by citizens for citizens

But what services are in the network?

What do you use it for?

Community Clouds

The vision of cloud-based services in community networks

We are talking about a *specific community cloud*:

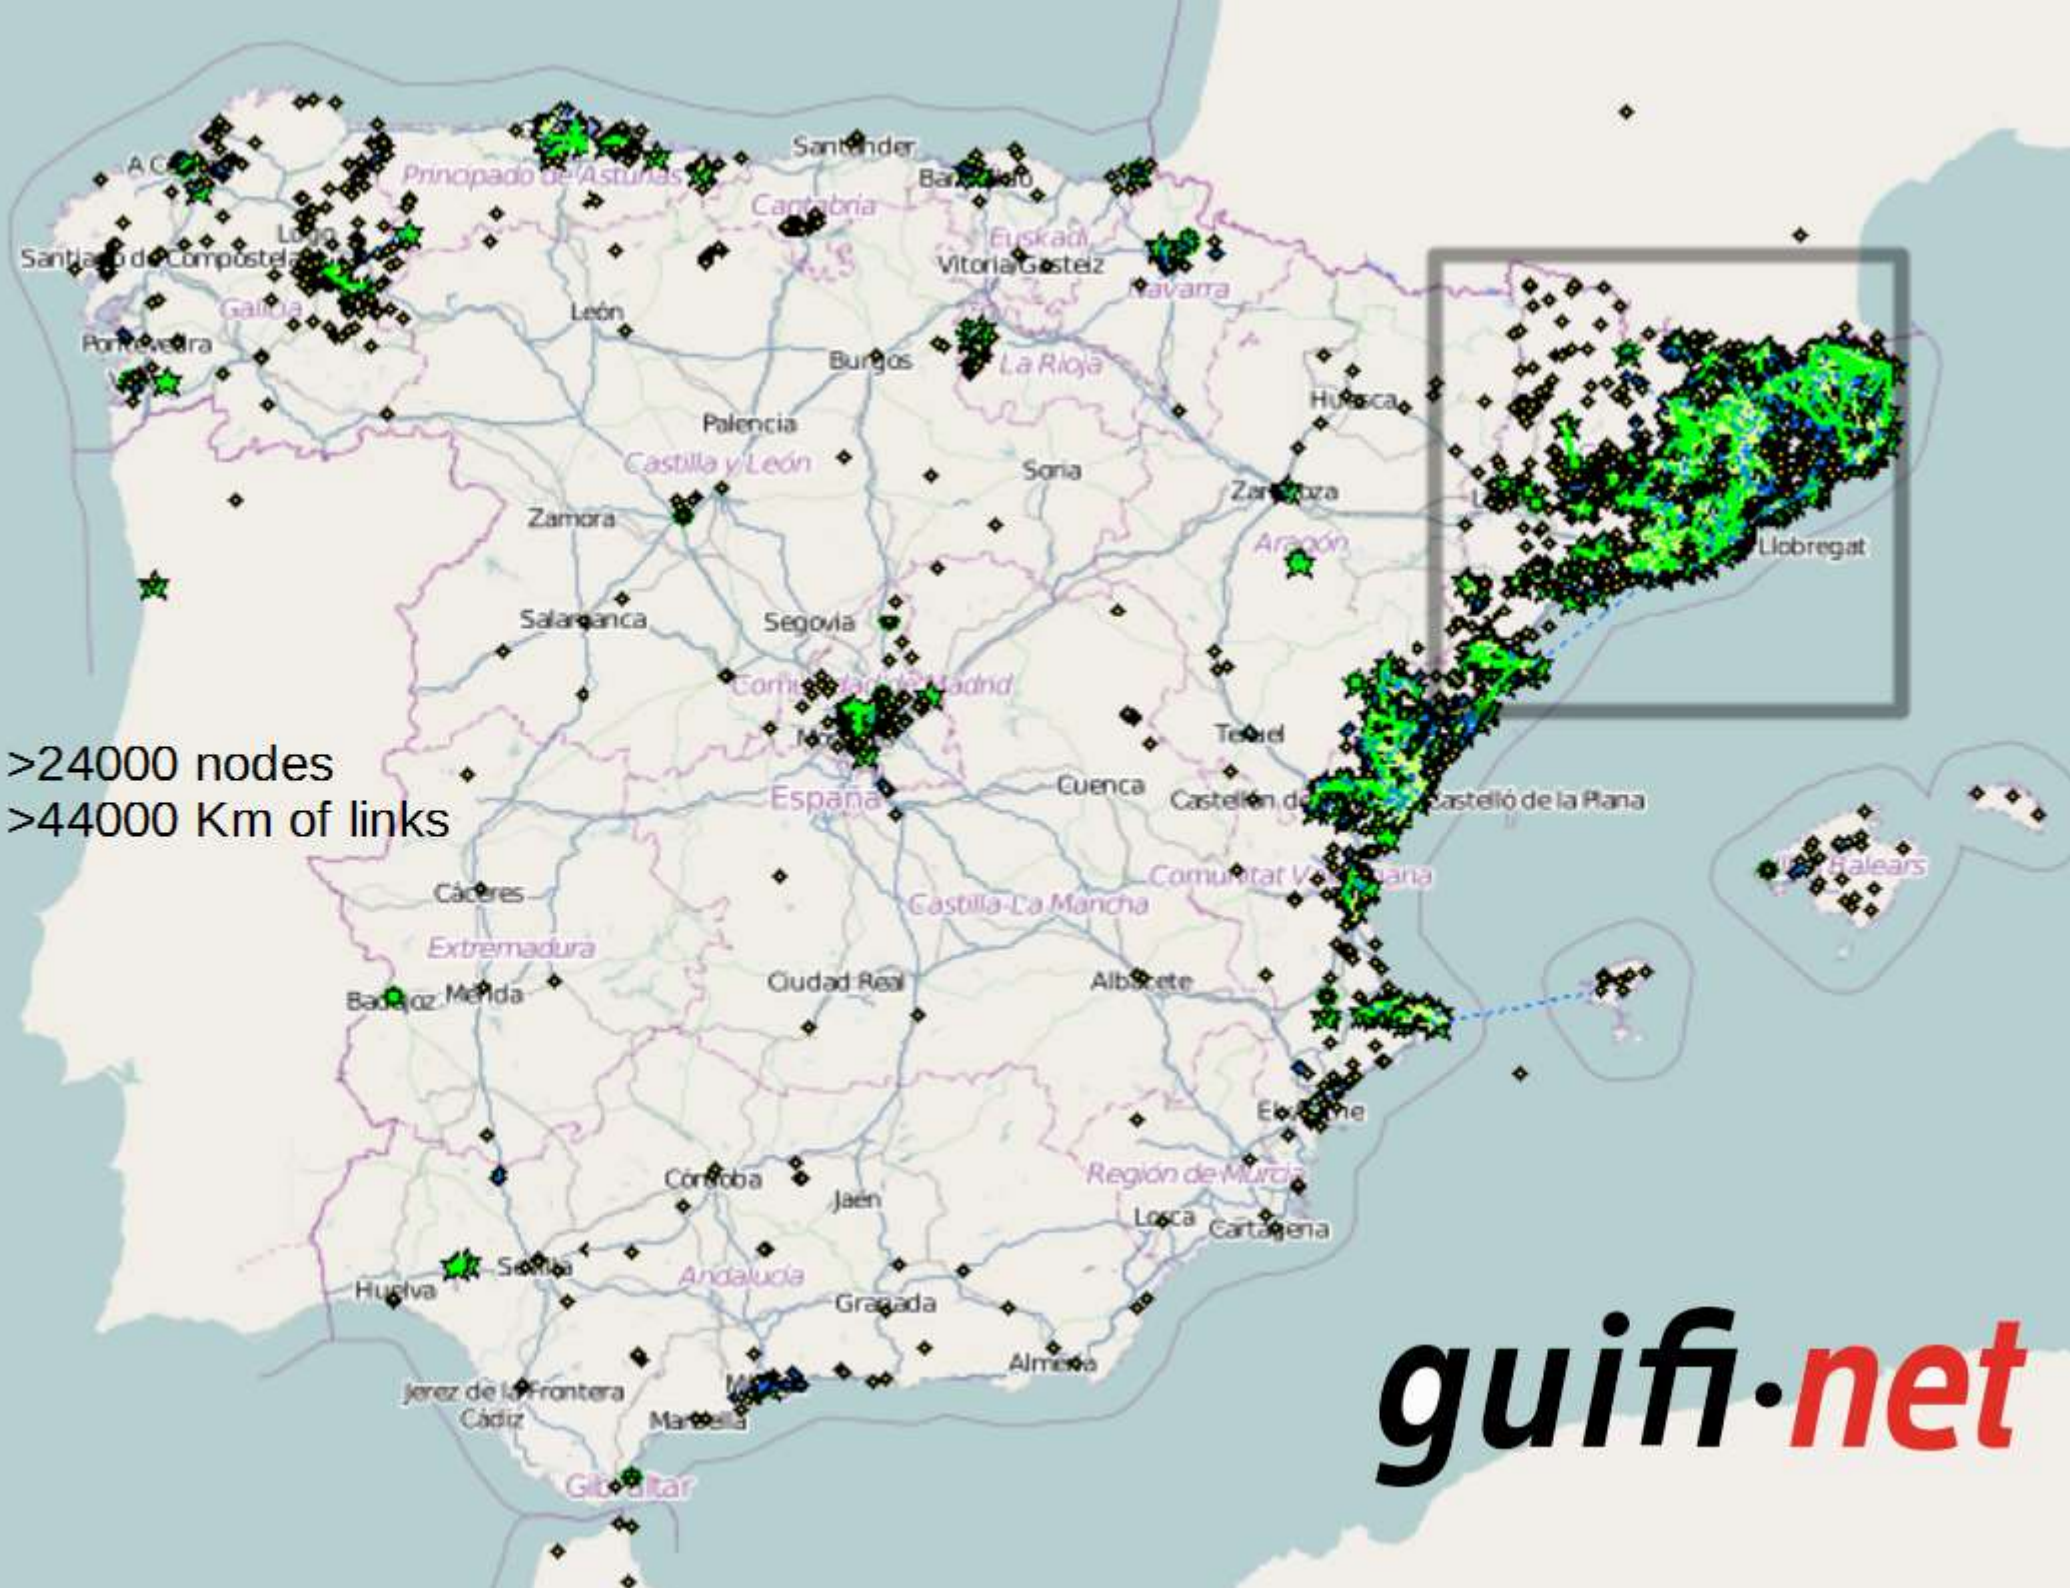

- built in community network
- hosted on community-owned computing and communication resources
- providing services of local interest

Cooperative deployment and maintenance of clouds by citizens for citizens

Hardware in Community Cloud

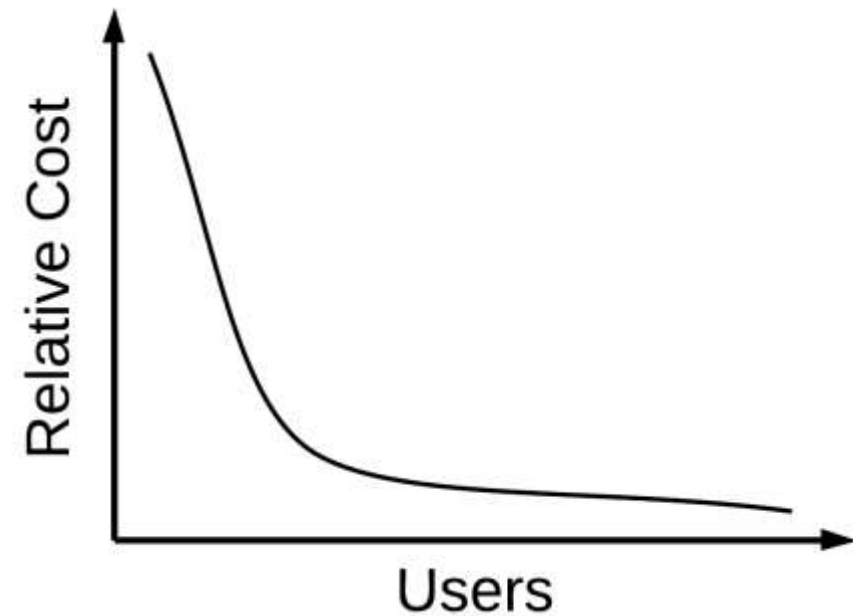

For People, By People

MACROECONOMIC MECHANISMS

Cost Value Relationship

Mechanisms - I

- Commons License
 - Reciprocal sharing principle
- Peering Agreements
 - Federating community clouds
- Ease of Use
 - Lower entry costs
 - Clommunity Distro

Mechanisms - II

- Social Capital
 - Bonding Social Capital
 - Bridging Social Capital
- Social Relationships
 - Equality matching
 - Communal sharing
 - Authority ranking
 - Market pricing

Mechanisms - III

- Transaction Costs
 - Easy to coordinate and collaborate
- Locality
- Overlay Topology
 - Location aware resource assignment
- Entry Barriers
 - Invitation only
 - Prior contribution

Mechanisms - IV

- Role of Developers
 - Facilitator between providers and consumers
- Service Models
 - Economic Sectors
 - IaaS, PaaS, SaaS
- Value Addition and Differentiation
 - ownCloud
 - FreedomBox
 - CloudEdge

Open Questions - I

How, why and where can community clouds be useful?

How to speed-up uptake and ensure sustainability of community clouds?

Can we devise socio-economic mechanisms to sustain collaboration in community clouds?

Open Questions - II

What kind of system architectures are suitable?

How to ensure security and privacy?

How to scale the system and ensure quality?

How to build location-aware applications?

Call for the Distributed Computing and Artificial Intelligence research community to contribute with more sustainable, adaptive, scalable, integrated, autonomic solutions for clouds in community networks, to support different Internet models for the future

CLOMMUNITY

A Community networking Cloud in a box

Thank you
